evasion with damage attached to it. Depending on the variant, the method to increase affinity differs, with GX providing Repeat Offender, X providing more Critical Eye points, and XR providing points in Handicraft and Razor Sharp, but being available later.Rathalos X Provides Attack, Weakness Exploit , and some points in earplugs, making this an easy to make and easy to use this variation in the Classical Mixset of Rathalos provides Razor Sharp in exchange for points in audilion, which It is not necessarily necessary in the SNS. A good alternative to the exploit of weakness when you can not hit weaknesses consistently, this grants even 30-affinity when you hit monsters consecutively, making it only a slightly weaker choice when compared to the exploit of weakness. Like all kinds of weapons, the usefulness of this ability varies depending on the weapon you use. When updating it with G3 G-rank materials from G3, you will get a very solid SNS with solid raw materials, high fire and natural white sharpness. The SNS Hermitauro / Coanatauro finally earns its time in the center of attention, since the other water SNSS require HR Break to be atble. Use with sharpness +2 to get purple, and see monsters fall asleep quickly. The other SLEP SNS is Nerslla's SNS. The Narguacuga SNS wins a little natural white clarity when you later update it on High Rank, which makes it the most out of the obsidian sword at the end of the high rank. The SNS finally begins to climb better than Djinn at this time, mainly because you probably do not have the resources to update it for the Daze Eye, which requires Hyper Hunter tickets to upgrade. It does not carry the barrel of Alchemy very though. Spam: X + A, A, A.This combination is slower, but causes more damage and carries alchemy barrel faster also © M.no-knockback Barrel: With the alchemy barrel selected in the item bar and drawn: X + A, R + Y. This uses the super armor granted x + A to shake the barrel freely for a few seconds, which can Being useful if you are next to the monster for some reason. The styles hierarchy is striker> Everything else. The Mizutsune SNS is the most solid option between the water SNS that you have access at this point in the High Rank, since it has a touch of Blue Sharpness and a saplid quantity of raw material à € "170 à €" with a little affinity and 28 of water. The increase in the classifications of this ha adds more access to combo.rank hapara load damage totalið30 (1196 SP) 25 + 14 + 15 + 40 = 109% / 5 accessOSI920 (1304 SP) 25 + 14 + 15 + 15 + 14 + 15 + 40 = 138% / 7 AccessOSII1250 (1700 SP) 25 + 14 + 15 + 15 + 15 + 15 + 15 + 15 + 15 + 15 + 15 + 15 + 15 + 15 + 7 + 45 = 170% / 9 Accessible for worse ha between the group, but that does not mean much, since all the arts of SNSà € " s are quite stellar. Definitely get for SNS,ain't more than the same for the High Rank set of Rathalos, with more points of attack than Low Rank. The SNS Guard is particularly weak, so it should be treated as an emergency use. Pressing R and Y at the same time will allow you to consume any selected item in your first-fold item bar. The least used not because it was nerve, but because it was overcome.
